LOGISTICS & SUPPLY CHAIN MANAGEMENT

The past several decades have seen globalisation push the logistics industry to the forefront of business operations. Adding digitalization business, the companies now compete with the entire world rather than just those close by. Customers can purchase goods from anywhere in the world and expect almost instantaneous delivery, something which would have been impossible several years ago. These shifts coupled with the advances in technology, offer both significant risk and potential reward. Experts have suggested that data will play the most crucial role in shaping the future of logistics over the next five years-90% to be exact, compared with industry averages of 83%. While the industry has never had access to more data, it is the digital culture and training that facilitates the current growing jobs in logistics. TransGlobe Academy offers POST GRADUATE DIPLOMA & DIPLOMA programmes in LOGISTICS & SUPPLY CHAIN MANAGEMENT which create a great ambience, resource & opportunity to the students to make their learning experience truly international resulting in a global career
